We source our freshly made, delicious Gelato from a local supplier. They get all their ingredients from the very best in organic fruits and their cream and milk from Windy Bank Farm at Hightown.

This farm dates back as far as the 17th century and is situated in over 200 acres of glorious farm land bordering Calderdale and Kirklees.

The dairy farm is run by second generation farmer Graham France, who is passionate about the breeding and welfare of his growing herd of more than 250 pedigree Friesian and Jersey cows which give gallons of the finest milk and cream daily for a special delivery.

Happy cows are crucial for the success of the business as the fresh and finest milk and cream is what makes their ice cream what it is.

In addition to caring about the welfare of his animals, Graham is also concerned about the welfare of the environment and in 2012 a wind turbine had been erected at the farm so that the farm will be able to run solely on wind generated power. Which we think is **ace!**
